Bogstroit Links
Bogstroit GH Ltd

Company Profile

Message de bienvenue

Le dynamisme croissant dans les secteurs de la construction, de la terre et des travaux publics, de l'exploitation minière, de la logistique, du pétrole et du gaz exige une approche qui identifie les liens entre ces secteurs. Avoir des années d'expérience dans ces domaines et voir la nécessité d'avoir un guichet unique de prestation de services qui donne des résultats optimaux en termes de qualité de travail, de temps et de coût m'a donné le besoin de réunir une équipe d'acteurs professionnels expérimentés. Pour cela vient BOGSTROIT LINKS. En dehors des objectifs susmentionnés, nous visons également à accroître le contenu et le renforcement des capacités du personnel local pour un bénéfice mutuel.

Welcome Message

The growing dynamism in the construction, telecommunications, earth & civil works, mining, logistics, oil and gas industries demands the kind of approach where identifying the links within these sectors forms a major part of getting engineering solutions to most tasks at hand. Having had years of experience in these areas and seeing the need to have a one stop shop delivery of services which yields optimal results in terms of quality of work, time and cost gave me the need to bring together a team of experienced professional players to achieve that. For this comes BOGSTROIT LINKS. Here aside the abovementioned objectives we also aim at increasing content and capacity building of local personnel for mutual benefit.

OUR HISTORY

Bogstroit Links was founded by a Structural Engineer with over two decades of working experience in the Engineering and Construction industry. With accumulated skills, knowhow and experiences from execution of many challenging projects in the design and build solutions, telecommunication infrastructure in various fields of roads, bridges and building construction, civil & earthworks, design and construct projects, writing job proposals, projects planning, costing, consultancy, site preparations of various projects with relocation of utility services lines, and compensation of land owners, and mining.

Bogstroit Links was established to be a 'one-stop-shop' engineering and Construction company that provides solutions to the technical requirements of potential clients in the areas of telecommunication, architecture, building & road construction, structural design, consultancy, transport and logistics, civil works, bulk earth movement, plants & equipment supply, mining services and anything engineering.

Its sister company, BOGSTROIT GH LIMITED (in Ghana) reflects the coverage of experience and projects that personnel of Bogstroit have undertaken. Like its Cote d'Ivoire counterpart BOGSTROIT GH LIMITED has affiliations with several well-established professional local and international service providers in the mining, oil & gas, construction, and transport & logistics industry. Bogstroit's setup comprises of a network of professional associates with long years of experience in various fields of operation. Bogstroit can provide solutions to all your technical, construction and engineering needs.

OUR PHILOSOPHY

At Bogstroit, we strive to provide our clients with an “I am assured” experience when chosen to execute their projects. Our emphasis on clear communication and follow through procedures also ensures that client’s objective are our top priority in planning and execution of all our processes.

Our project management and execution philosophy is anchored on:

End Products

Provision of first class quality end-products.

Research

Studying and applying, for each project, cost effective and time-cutting methodologies to meet our clients’ requirements.

Empowerment

Creating of employment opportunities for locals, training and upgrading their skills.

Inputs

Studying and improving local content inputs in our projects for the benefit of projects locations.

Environmental Protection

Impacting good health, safety and environmental protection knowledge at workplace for effective production.

Control System

Maintaining high standard quality control systems in place.

Flexibility and Efficiency

Operating a dynamic and flexible system capable of quickly adapting to changes to scope of works as and when they come by clients' request and still meeting projects' budget requirement and milestone dates.

Technoloav

Keeping abreast with implementation of modern technologies for improved results.

BOGSTROIT LINKS TODAY

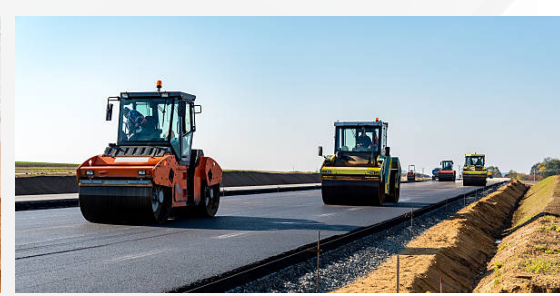

Today, Bogstroit Links has grown to become an international engineering and construction company with affiliations and several well-established professional local and international service providers in the mining, oil & gas, construction, and transport & logistics industry including BOGSTROIT GH LIMITED (in Ghana).

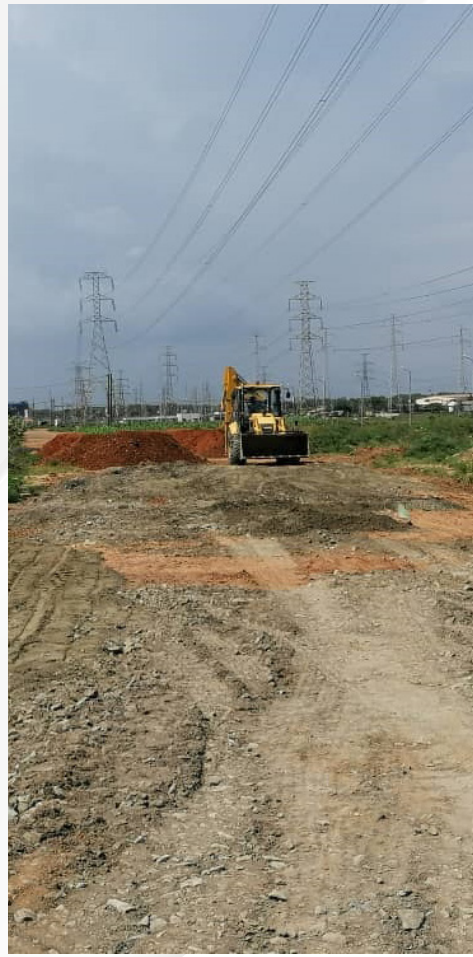

Our setup comprises of long years experienced professionals in our various fields of operation who can provide solutions to all technical, construction and engineering needs.

We undertake a variety of projects for a wide range of cliental – from small private developments to large Government projects. Our unique and flexible project management systems ensure that a positive outcome is achieved regardless of size or nature of the project.

With 22 years experience, personnel of Bogstroit working in different capacities on various multi-million-dollar projects in the West African sub-region, have contributed tremendously in infrastructural development and civil-mining construction industries
